GENERATION NEW

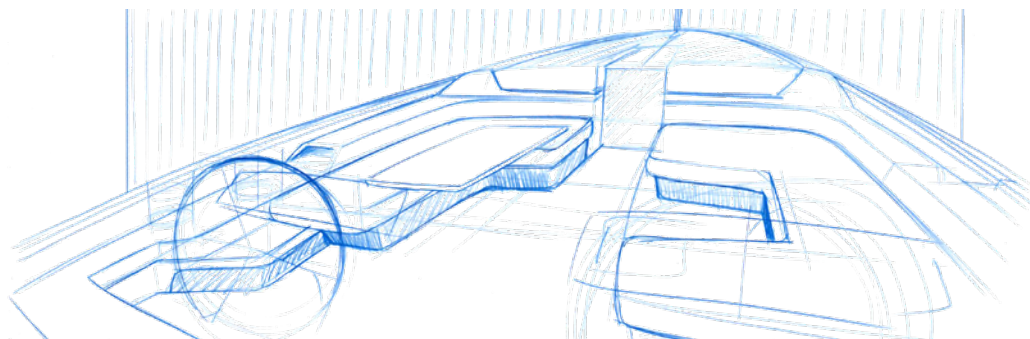

VISION & SUCCESSES

The cooperation with Berret-Racoupeau has produced a concept that reaches completely new dimensions. While we are breaking new ground, we remain true to the Hanse DNA and continue to focus on Fast Cruising, Easy Sailing and Individual Customisation - now in an innovative and new look. The new hull design clearly stands out from the previous models with a sporty, aggressive look and clear lines. The new design impresses with striking details: an angular, flat and elongated cabin superstructure, voluminous hull with high freeboard, a negative bow stem as well as hard-set chine edges, give the ship a unique appearance and ensure enormous living space and unparalleled performance on the water.

HANSE 460 & 510

 VISIT HANSE 510
AND HANSE 460 [HERE](#)

The Hanse 460 has marked the beginning of a new era in sailing boat design, with her outstanding design being internationally recognized and awarded. Just a year after its spectacular success, her big sister ship followed suit with the Hanse 510. As typical for Hanse, the Hanse 510 impresses with her easy handling and innovative technical solutions. Continuing the success story of this new design generation, the new Hanse 410 follows in the footsteps of her larger sisters, while being far from being a mere copy at 40 ft.

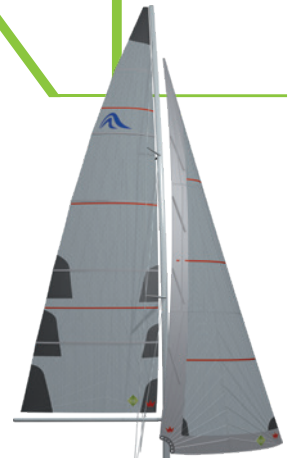

Design for FUTURE

SUSTAINABLE VACATION ON WATER

Sail into a greener future with the Sustainable Performance Sail (SPS) from Elvstrøm Sails, the first sail wardrobe made from recycled material. This innovative solution offers a high-quality laminate sailcloth made mainly from recycled polyester, making it a sustainable and environmentally friendly choice. The soft and easy-to-handle nature of the cloth makes for a comfortable and enjoyable sailing experience.

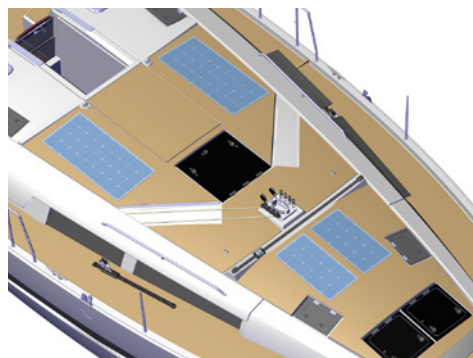

CLIMATE-NEUTRAL SAILING

Sail without compromising the environment: with the carbon-free propulsion system, you actively contribute to reducing harmful emissions. But that's not all - we understand the importance of safety at sea, which is why we've equipped the battery with a top-quality stainless steel safety case. An intelligent shutdown function automatically regulates the power output according to battery temperature, ensuring carefree sailing.

Full electric propulsion with up to 55 NM.

GREEN ENERGY

As a sport that connects us to nature, sailing has always been about finding ways to be more environmentally friendly. With the advancements in technology, we now have an opportunity to make sailing even more ecological. One of the most exciting developments in the sailing community is the use of solar energy as a source of power on board. Solar panels are particularly useful for those who plan to spend long periods at sea as they provide a reliable and renewable source of energy. They can power all the essential systems on board, from lighting to instruments, without the need for any fuel.

ENJOY THE AUTARKY

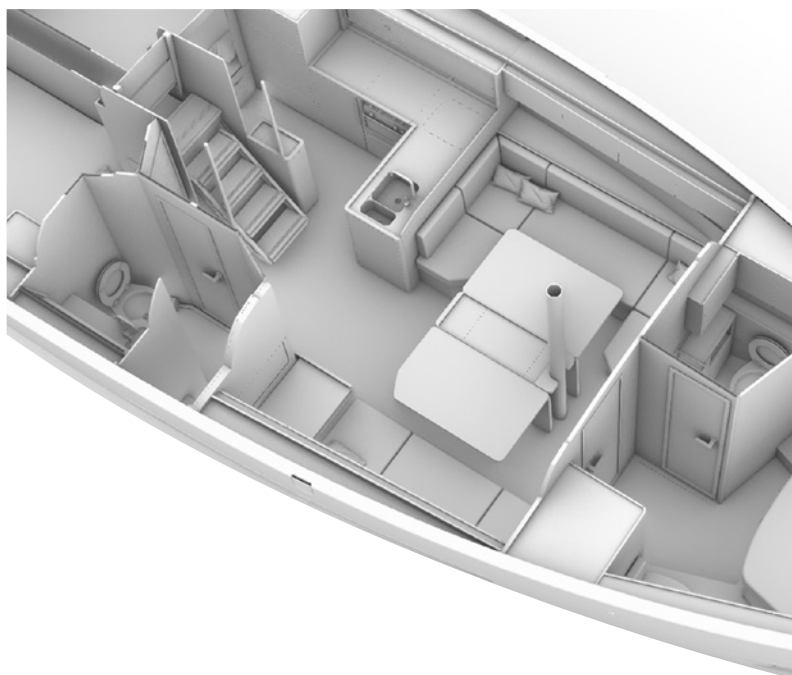

47 NEW HANSE

With the revolutionary technology of our fuel cell, you enjoy the flexibility to stay on the water regardless of the weather. Unlike conventional combustion engines that burn fossil fuels and produce harmful emissions, fuel cells generate emission-free energy at the touch of a button. They are also extremely quiet, so you can enjoy the beauty of nature without being disturbed by noisy machinery.

The EFOY Pro 2800 is a fuel cell with up to 125 W.

READY FOR GREAT MOMENTS

Treat yourself and your guests to regional culinary delights in our spacious galley. With a large fridge and ample storage capacity, you can prepare fresh and healthy meals daily. Or use the grill at the wet bar to prepare freshly caught specialties. In the generous saloon or spacious cockpit with double tables, you can dine with your family or friends and create unforgettable memories.

47 NEW HANSE

designed by berret • raoupeau

Whether you're an experienced sailor or a beginner, easy sailing allows you to focus on enjoying the beauty of the sea and the thrill of the wind in your sails, without the stress and physical strain that can sometimes come with traditional sailing. With easy sailing, everyone can experience the joy and freedom of being out on the water.

HANSE WORLDWIDE

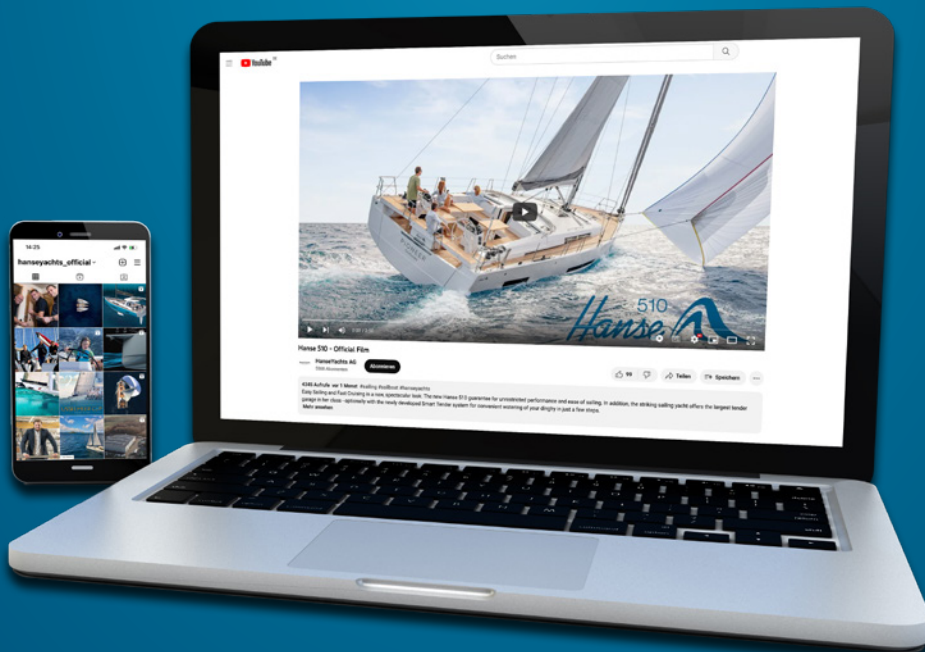

Are you ready to turn your lifelong dream into reality? Our worldwide dealer network is ready to answer your queries and provide you with detailed information on our new Hanse 410. Stay up to date with our brand and Hanse owners by following us on our social media channels.
